

EVE CHARITY IMPACT REPORT

REPORT PERIOD ENDING - 2021/01/31

EVE CHARITY, EST. 1993
CHARITABLE #14009 2578 RR0001

Programs & Activities

Ongoing Programs

EVE continued to develop its programs with the internet of things (IoT) to organize volunteer activities with partners on infectious diseases, species-at-risk, climate change and peace. We continued to work in Madagascar and Great Lakes Africa, particularly Zambia, Malawi, Uganda, Congo DRC, Kenya, Tanzania, Mozambique, South Africa and in Canada's indigenous communities. Due to limited resources, we completed our charitable objects during the year primarily by the use of volunteers. We continued developing sustainable energy capacity for African schools and clinics affected by disasters. We continued our crowdsourcing programs and a youth exchange between indigenous communities in Canada, urban Canada and Africa, with a focus on species-at-risk, cultures-at-risk and infectious diseases. The powerstats and mobile aerostats developed over the past two years created a platform to train youth to create peace corridors in areas prone to conflict, pandemics and disaster. There is continued emphasis on training youth to prepare for IoT and augmented intelligence (AI) applications to peace and sustainability. We began collaborating with efforts to manage covid-19 in Zambia, Malawi and Mozambique using the powerstat platform to create peace corridors in areas in and around national parks and transfrontier conservation areas. There is increased emphasis on training youth to prepare for IoT and the use of. EVE expanded its virtual internships with universities in Canada and Africa, with a mission to increase cross-cultural exchanges for youth between Canada and Africa.

Programs & Activities

New Programs

EVE began designing a youth technology program to train youth on how to develop and operate solar electric drones to deliver critical supplies. The immediate focus is to train youth from remote areas on how to fly aircraft with critical cargo such as vaccines. The program expands into programming these aircraft to fly autonomously. While in its early stages, the immense interest on the part of youth in Africa to learn how to build, program and operate technology to save lives has encouraged us to continue developing this youth technology program. EVE expanded its relationship with Africa's national parks and greater parks ecosystems, introducing a community AI program for health in greater parks areas. This has increased participation in idea exchanges between different communities and the challenges surrounding sustaining parks, particularly addressing the risks of human-animal conflict, poaching species-at-risk during a covid-19 pandemic that has destroyed the economics of tourism and its support for conservation.

Operations Outside Canada

7 Countries

1. Burundi
2. Ethiopia
3. Kenya
4. Madagascar
5. Mozambique
6. Uganda
7. Zambia

Financials

Revenue

Total Revenue:
\$134,510.00

- Receipted donations \$117,676.00 (87.48%)
- Non-receipted donations \$0.00 (0.00%)
- Gifts from other registered charities \$5,628.00 (4.18%)
- Government funding \$11,206.00 (8.33%)
- All other revenue \$0.00 (0.00%)

Expenses

Total Expenses:
\$86,814.00

- Charitable programs \$86,580.00 (99.73%)
- Management and administration \$234.00 (0.27%)
- Fundraising \$0.00 (0.00%)
- Political activities \$0.00 (0.00%)
- Gifts to other registered charities and qualified donees \$0.00 (0.00%)
