EVE CHARITY IMPACT REPORT

REPORT PERIOD ENDING - 2017/01/31

Programs & Activities

Ongoing Programs

EVE continued to develop its program with extensive use of the internet to organize volunteer activities with partners on infectious diseases, species-at-risk, climate change and peace. We continued to work in Madagascar, Africa and in Canada's First Nations. We continued to develop networks of biologists, scientists, conservation experts and infectious disease experts. We continued to develop sustainable energy programs targeting blackouts in slums, and electricity for health clinics in slums and remote areas. Due to limited resources, we completed our charitable objects during the year primarily by the use of volunteers. We continued developing our crowdsourcing development using integrated media with the goal of creating new sources of funding and a flow of ideas for sustainability programs in northern Canada and Africa. We expand these activities in First Nations communities in northern BC and Ontario. EVE continues to develop a youth exchange between First Nations in Canada, urban Canada and Africa, which will select youth with the top-rated ideas to solve specific problems related to species-at-risk, cultures-at-risk and infectious diseases. These youth will be provided with opportunities to work with other youth cross-culturally to try to develop situations in these themes. This is a similar program to the large exchanges EVE organized in 1990s, except now optimizing digital tools and social media.
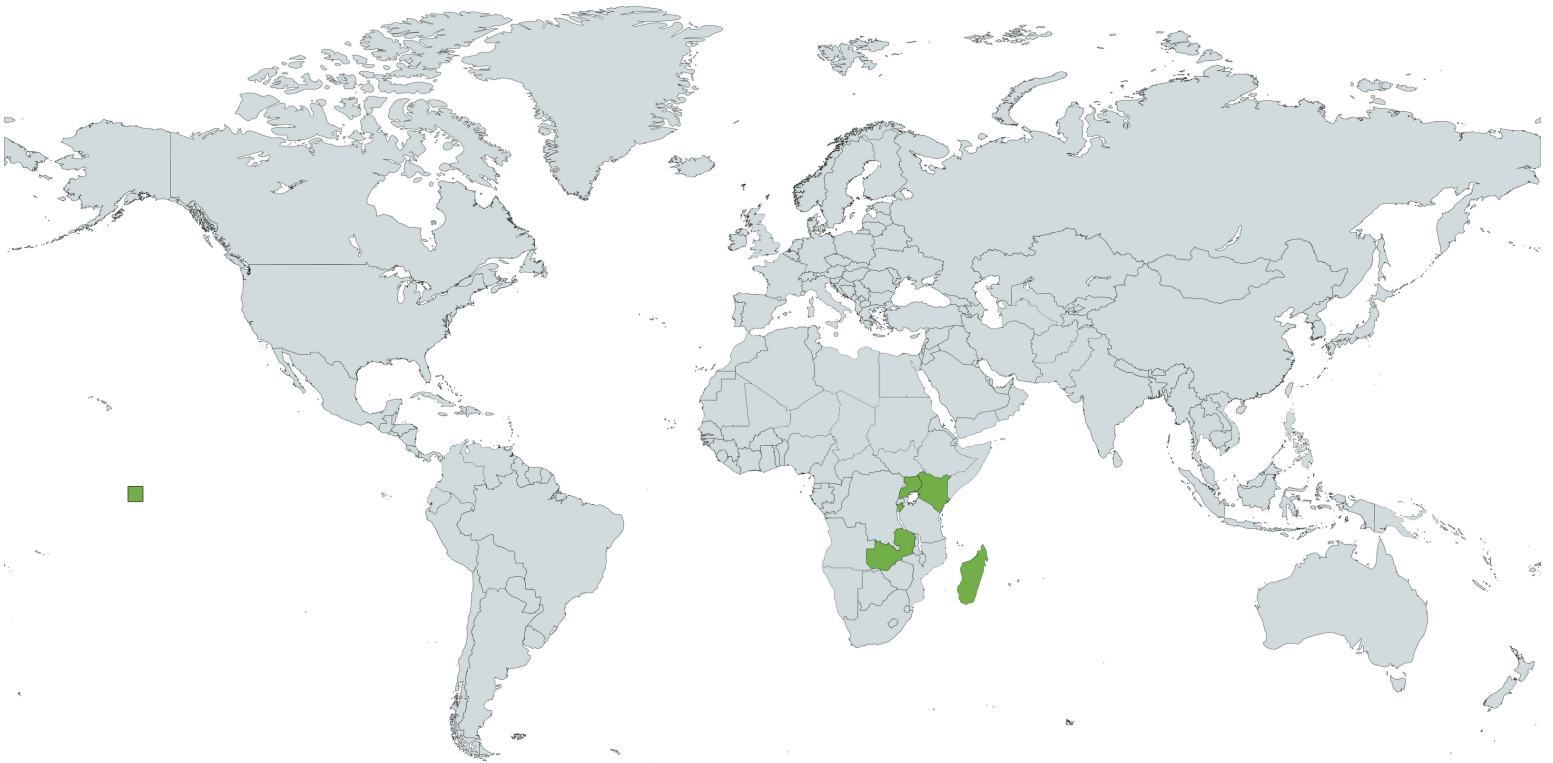

Programs & Activities

New Programs

Programs are being developed to support a new wireless aerostat platform called Power Stat. This is a platform that provides WIFI and surveillance to create peace corridors in challenging environments. The use of this platform is to engage local communities in addressing threats of war, poaching and disasters. Peace corridors will be created from stable bases of operations and provide corridors into difficult and threatened zones. These programs will use the same technologies as before, but now participants will be able to use a dedicated internet service to cover remote disconnected areas and use the surveillance technology to identify threats in war zones, disaster areas and areas where people are poaching or burning down forests.

# Operations Outside Canada

5 Countries

1. Burundi
2. Kenya
3. Madagascar
4. Uganda
5. Zambia

Financials

Revenue

**Total Revenue:
$177,415.00**

- Receipted donations $175,000.00 (98.64%)
- Non-receipted donations $0.00 (0.00%)
- Gifts from other registered charities $2,415.00 (1.36%)
- Government funding $0.00 (0.00%)
- All other revenue $0.00 (0.00%)

Expenses

**Total Expenses:
$139,413.00**

- Charitable programs $139,360.00 (99.96%)
- Management and administration $53.00 (0.04%)
- Fundraising $0.00 (0.00%)
- Political activities $0.00 (0.00%)
- Gifts to other registered charities and qualified donees $0.00 (0.00%)
